## AP Latin Syllabus: 10 Sessions

Every student approaches working on AP Latin coursework with their tutor differently. Homework and in-class exams often determine what the student and tutor work on, and when. This syllabus offers a standardized approach to students who want to prepare for the AP Exam at the end of the academic year. It goes systematically through *The Aeneid* and *The Gallic War*, helping students review their translations, identify key literary devices, and think through how best to write open responses about these texts. As students work through these two texts, they also devote time and attention to preparation for the sight translation found on the AP Exam. This syllabus assumes sessions are 90 minutes long.
